## PROFILE

I'm a passionate and open minded JavaScript Front-end developer, with 3+ years of experience in solving complex tasks building Single Page Applications. During my career, I was involved in all aspects of the software development process from early stages of requirements analysis to supporting and refactoring legacy code and mentoring junior developers.

I have a strong knowledge of JavaScript and other related web technologies e.g. HTML/XHTML, DOM, and CSS. I've got a solid understanding and experience with OOD/OOP and design patterns. My experience lies in the scope of modern MVC and front-end frameworks. I am actively practicing and maintaining SCRUM methodology at my projects.

My philosophy towards work are:

- ✓ Clean and maintainable code for the colleagues.
- ✓ Friendly experience for the users.
- ✓ Revenue for business.

## WORK EXPERIENCE

<b>GlobalLogic</b> <b>Kyiv</b> <b>Ukraine</b>	<b>Front-end developer / JavaScript web developer</b>	<b>08/2014 - present</b>
As a member of distributed front-end Scrum team, I was enhancing and maintaining complex content management Single Page Application based on ExtJS + React. This media platform allows users such as composers, audio and video editors, newsmakers, etc. to access, share, play edit, and interacts with multimedia. Besides of that, it provides back-end and front-end API and SDK for the integration with third-party products. The interface has unified theme and components to provide the same look and feel for all integrated components.		

Achievements:

- Implemented the lazy loading and lazy rendering search widget;
- Introduced the code quality tools;
- Implemented HTML5 drag and drop API for cross pane interaction in application;
- Implemented APIs for third-party multimedia products using hypermedia REST;
- Introduced CI processes for some modules;

## WORK

# Front-end developer / Junior JavaScript web developer

01/2013 - 08/2014

As a member of distributed front-end Scrum team, I was enhancing and maintaining the complex user management system based on ExtJS + Knockout.js framework.

User management system provides administrators access to a wide range of user management operations such as configuring access levels, license and roles levels. Batch user manipulation such as backup, restore, versioning and migrate user base.

*Achievements:*

- Improved customer satisfaction by implementing various customer-specific customizations and providing client-side APIs;
- Improved keyboard accessibility for the user's flows;
- Styled the new version of components regarding guidelines;

## EDUCA

**B. Sc. Computer  
science  
Kyiv  
Ukraine**
